Schlumberger

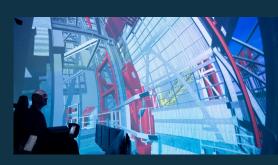

Boosting the Discovery of New Exploration Opportunities

SIS Forum 2019

Markus Geiger (Equinor – Advisory Role) Charlotte Fraser, Claire Castagnac (Schlumberger – Technical execution)

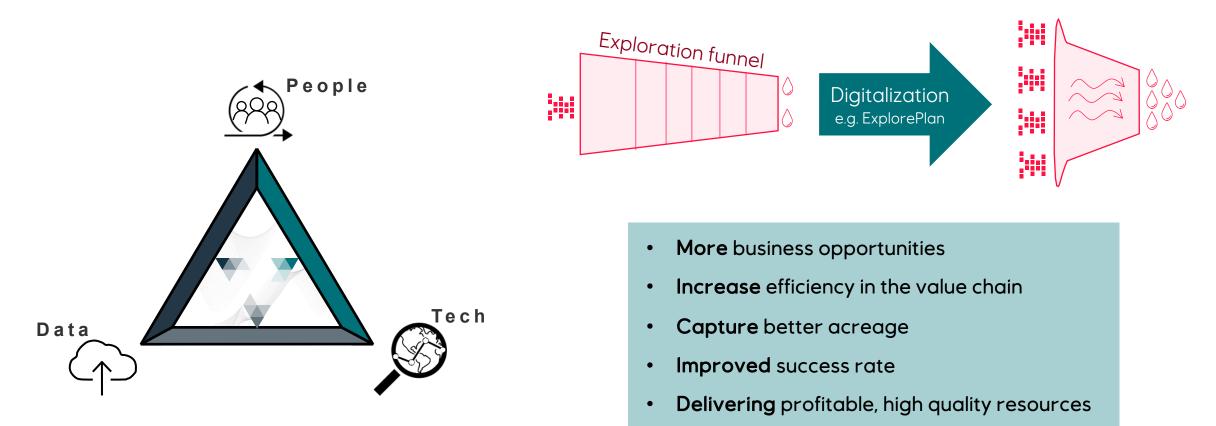

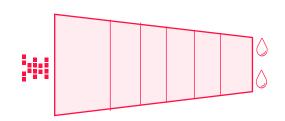

Equinor | A Leading Digital Explorer

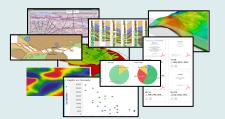

• Boosted moral and motivation!

Exploration Process | Pain-points

Data and Information Pool

Data is

- difficult to find
- non-searchable, neither referenced nor indexed
- hidden behind applications
- not single source & different formats

Teams/Leadership

- Insufficient communication
- Unclear roles and responsibilities
- Individual interpretation of requirements

People

Tech

• Knowledge moves with people

Data

Consequences

- Sub-optimal decisions due to time loss and incomplete data foundation
- Knowledge decays & loss

Platforms and Applications

Fragmented Tool landscape

- Multiple applications (no one big picture!)
- No contextual flow (how did we get here?)
- No decision capturing (why was that done?)

3 | SIS Global Forum | ExplorePlan - SLB-EQN Digitalisation Collaboration

Schlumberger-Private

Mission Statement

A hydrocarbon exploration management tool that plans, tracks and facilitates the creation, iteration and maturation of new and existing opportunities in the exploration funnel

Schlumberger equinor

ExplorePlan | Components and Goals for Phase 2

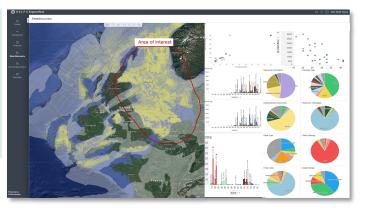

Project

- Subsurface projects planner: overview, including project types, team and tasks
- Defines and manages decision gates: milestones, deliverables

Data Discovery

- Smart search and shopping basket
- Data analytics to quality control data

Knowledge Board

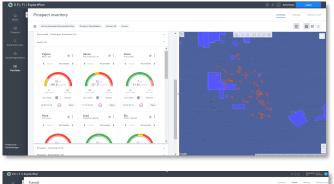

- Boards fully customizable for user type, opportunity type and technical requirements
- Board timeline and versioning (decision gates)
- Consumes any data sources (unstructured data, Petrel etc.)
- Collaborative functions for teams
 and reviewers
- Dynamic reports of predefined templates (documentation requirements)

Opportunity Inventory & Assessment

- Interactive interface to prospect evaluation tool (GeoX)
- Multi-scenario assessment function
- Analogue suggestions for probability distributions
- Auto-populate parameters from analogous prospect assessments
- Interactive analytics of prospect parameters from a portfolio selection
